Components & Radicals 汉字偏旁部首	(S/TCH) zhōu = land; state	(S/TCH) zhōu = continent
chuān 川 = flowing river channels	州	洲
、 = sandbar(s) in the middle of a river		
sān 氵 = water (of ocean)		
Note: These two characters have two different definitions; they are not an SCH–TCH character pair. 州 originally referred to land or sandbars formed by sediment in a river or flood zone; it later came to mean an administrative region or state. 洲 originally replaced 州 in its sense of “sandbar” and now commonly refers to a continent or large landmass surrounded by oceans.	guǎngzhōu guì zhōu yángzhōu jiǔ zhōu 广州; 贵州; 扬州; 九州;	yà zhōu měi zhōu ōu zhōu dà yáng zhōu 亞洲; 美洲; 歐洲; 大洋洲;
