Components & Radicals 汉字偏旁部首	(SCH) dào = way; road	(TCH) dào = way; road
xíng 行 = a road intersection (in the proposed oracle-bone form)	道	道
shǒu 首 = a head or leader		
zǒu 走 = walk; walking		
Note: One interpretation of the oracle-bone form is that it depicts a person who knows which road to take at an intersection. In the bronze-script form, an enlarged eye was added to the figure, emphasizing vision and the deliberate choice of a path. In this interpretation, 道 differs from the more general 路 (lù, road): 道 can suggest a chosen direction, a guiding principle, or a purposeful way forward.	dào lù zhèng dào xié dào guǐ dào zhī dào 道路; 正道; 邪道; 轨道; 之道	dào lù zhèng dào xié dào guǐ dào zhī dào 道路; 正道; 邪道; 軌道; 之道
